

Instructions for use

decosept®

Product for hygienic and surgical hand disinfection

Gentle hand disinfection for a broad spectrum of applications

Scope of application

Classical hand disinfection for all areas in which efficient and effective disinfection are crucial: hospitals, care homes, GP and dental practices, industrial companies, food industry, pharmaceutical industry, public institutions and for private use.

Application

Use decosept® on intact skin only. Good hand hygiene depends on careful hand care, only healthy skin can be effectively disinfected.

Use a sufficient amount to keep the treated hands moist throughout the entire application time.

Hands must be visually clean.

Hygienic hand disinfection

At least 3 mL per hand, use as per the EN 1500 hand-rubbing method. Ensure complete and permanent wetting of the skin throughout the entire contact time.

Surgical hand disinfection

Effective pre-cleaning of critical areas of the skin, followed by thorough wetting by rubbing-in with decosept® (hands and forearms) for at least 180 seconds. The hands and forearms must be kept wet throughout the entire rubbing-in time.

Properties

- Active against all enveloped viruses
- Alcohol-based preparation for hygienic and surgical hand disinfection
- Excellent, immediate effect
- Especially well tolerated by the skin and moisturising thanks to skincare complex

Efficacy

Spectrum of activity	Test method	Concentration	Contact time
Hygienic hand disinfection Bactericides, yeasticides	VAH, EN 1500	undiluted	30 seconds
Surgical hand disinfection Bactericides, yeasticides	VAH, EN 12791	undiluted	180 seconds
Active against enveloped viruses*	EN 14476	undiluted	15 seconds
Bactericides	EN 13727	undiluted	15 seconds
Yeasticides	EN 13624	undiluted	15 seconds
Mycobactericides	EN 14348	undiluted	30 seconds

VAH and IHO listed

* Includes the following viruses: All enveloped human pathogenic viruses such as HBV, HCV, HIV, influenza viruses, corona viruses and the Ebola virus.

Product data sheet

decosept®

Product for hygienic and surgical hand disinfection

Gentle hand disinfection for a broad spectrum of applications

Ingredients

100 g decosept® contain:

44.7 g propan-2-ol

21.9 g propan-1-ol

0.1 g benzyl-C12-16-alkyldimethylammonium chloride

Excipients:

Skincare components, fragrance, colouring

Expert reports

decosept® has been extensively investigated in accordance with VAH-methods and EN/ISO standards with regard to its efficacy as well as its skin compatibility. Expert reports are available upon request.

Physicochemical data

Appearance	undiluted	clear, blue
Type	undiluted	liquid
Density	undiluted	0.87 g/mL (20°C)

Packaging

- HDPE and PP
- Wall dispensers and pump heads are available, please request the relevant documents.

Additional information

Before using the product, please read the instructions for use and the relevant safety data sheet.

Benefit from our know-how! Please contact us for further information regarding your specific application.

Container sizes

Container type	Content	Item number
Tunic/labcoat bottle	100 mL	510915.00-CA09
Euro dispenser bottle	500 mL	510915.00-CA05
Euro dispenser bottle	1000 mL	510915.00-CA10
Canister	5 L	510915.00-K05A
